

CIVIL ENGINEER

COMPANY: Tryon Engineering Inc.

LOCATION: Fort St. John or Dawson Creek, Hybrid option

APPLY TO: careers@tryongroup.ca

WAGE RANGE: \$125,000 to \$160,000

THE ROLE

We are looking to add a capable and qualified Civil Engineer to our team for a permanent full-time position.

Tryon Engineering Inc.'s civil team provides services to residents, local governments, and industrial clients primarily in the north and also throughout Western Canada. This role is important to help fill the ever growing demand for professional services needed to keep up with demand of our clients and their projects. Our company is positioned for success, and we want to work with the best people to realize the opportunities available to us.

ABOUT TRYON

Tryon has been operating in Northeast B.C. since 1961. Our group of professionals includes engineers, surveyors, technologists, and support staff. We have office locations in Fort St John and Dawson Creek as well as staff working hybrid across Canada. Tryon's dedicated and dynamic team of Professionals has many years of combined experience working on municipal development, industrial construction, and residential projects.

Tryon is locally owned and operated and works diligently to provide top-quality engineering, procurement, construction, and management services to our clients.

POSITION OVERVIEW

- Working with members of the engineering team to plan and design municipal projects including roads, deep utilities, stormwater management, site grading, erosion control
- Preparing plans and reports to cover projects for changes in and about a stream for government approvals. Including determining flood values based on available data and testing to determine sizing and parameters of various crossing types
- Working within Dam Safety Regulations to complete the documents required for approval

- Design computations required to fulfill a design
- Follow engineering association's best practice standards
- Developing construction specifications, schedules, and quantity calculations
- Performing construction inspections as needed
- Conducting technical analyses of survey and field data to prepare reports
- Preparing other technical reports as needed
- Providing project management services including, preparing contract documents, evaluating tenders, and project scheduling
- Overseeing teams of 1 to 5 people and assisting with coordinating other professionals

QUALIFICATIONS & EXPERIENCE

- Registration or eligibility as a Professional Engineer by a provincial or territorial association
- Degree in Engineering with a focus on Civil Engineering or a related discipline
- 5 years + of direct experience in civil engineering projects
- Registered as a Professional Engineer by a provincial or territorial association or eligible for registration as a Professional Engineer by a provincial or territorial association
- Effective communication and interpersonal skills
- Strong computer skills including AutoCAD, Civil 3D, MS Office, and data analysis software such as SWMM or HEC-RAS
- Strong technical and report-writing skills
- Detail oriented and organized
- Class 5 Driver's License in good standing

TRYON OFFERS

- Competitive compensation, including bonuses
- Opportunity for rapid growth and exposure in a smaller-scale company
- Health care benefits
- Flexible schedules to meet family needs
- Personal goals and career development is encouraged and supported
