

GEOTECHNICAL ENGINEER

COMPANY: Tryon Engineering Inc.

LOCATION: Fort St. John or Dawson Creek, Hybrid option

APPLY TO: careers@tryongroup.ca

WAGE RANGE: \$125,000 to \$160,000

THE ROLE

We are looking for a skilled Geotechnical Engineer to join our team in a permanent, full-time position.

At Tryon Engineering Inc., our geotechnical team provides services to residents, local governments, and industrial clients across Northern and Western Canada. The successful candidate will handle site investigations, analysis, and provide recommendations to ensure safe, sustainable project development across residential, commercial, infrastructure, and industrial sectors. This role requires technical expertise, strong communication skills, and the ability to collaborate with multidisciplinary teams. As demand for professional services grows, this position is key to supporting our clients and their projects.

We are eager to work with top talent to help us seize the opportunities ahead.

ABOUT TRYON

Tryon has been operating in Northeast B.C. since 1961. Our group of professionals includes engineers, surveyors, technologists, and support staff. We have office locations in Fort St John and Dawson Creek as well as staff working hybrid across Canada. Tryon's dedicated and dynamic team of Professionals has many years of combined experience working on municipal development, industrial construction, and residential projects.

Tryon is locally owned and operated and works diligently to provide top-quality engineering, procurement, construction, and management services to our clients.

POSITION OVERVIEW

- Coordinate and execute geotechnical, geological, geophysical, or geohydrological data acquisition and analysis with the engineering team.
- Provide recommendations and reports on infrastructure construction or improvements, including building settlement, slope stability, and foundation analysis.
- Perform necessary geotechnical design computations to support project solutions.

- Adhere to engineering association's best practice standards.
- Conduct geotechnical construction inspections and monitoring as required.
- Prepare additional technical reports as needed for various projects.
- Provide project management services, including contract document preparation, tender evaluations, and project scheduling.
- Lead and oversee teams of 1 to 5 people while coordinating with other professionals.
- Collaborate with and support a full-service CCIL-certified lab and staff.
- Review laboratory and field test data, ensure regulatory compliance, and communicate with clients and contractors to meet project requirements

QUALIFICATIONS & EXPERIENCE

- Registration or eligibility for Professional Engineer (P.Eng.) designation in BC or another provincial/territorial association.
- Degree in Geotechnical Engineering, Civil Engineering, or a related field.
- 5 years of direct experience in geotechnical engineering, preferably in BC or Western Canada.
- Strong knowledge of local geotechnical standards, codes, and regulations.
- Proficiency in geotechnical software and design/analysis tools.
- Effective communication, interpersonal, and report-writing skills.
- Strong problem-solving abilities and attention to detail.
- Experience with environmental geotechnics, geohazards, and regional soil types.
- Field experience with geotechnical investigations and drilling operations.
- Class 5 Driver's License in good standing and the ability to work in both office and field settings.

TRYON OFFERS

- Competitive compensation, including bonuses
- Opportunity for rapid growth and exposure in a smaller-scale company
- Health care benefits
- Flexible schedules to meet family needs
- Personal goals and career development is encouraged and supported
